

Cookie Policy

Last updated: 30 July 2026

1. Purpose of this Policy

This Cookie Policy explains how "INFOTECH" SIA ("INFOTECH", "we", "us" or "our") uses cookies and similar technologies on this website (the "Website"). It also explains the choices available to you.

The exact cookies used on the Website depend on its technical configuration. The current cookie declaration is generated from, and kept consistent with, the live Website.

2. What cookies are

A cookie is a small text file placed on, or read from, your browser or device when you visit a website. Cookies can support basic functions, remember a choice or provide information about how a website is used.

Similar technologies include local storage, pixels, tags and software development kits. This Policy uses the term "cookies" for these technologies where they store information on your device or access information already stored there.

Cookies may be:

- session cookies, which expire when you close the browser; or
- persistent cookies, which remain until their stated expiry date or until you delete them.

A first-party cookie is set by the Website. A third-party cookie is set through a service supplied by another organisation.

3. When consent is required

Consent is not required only where storing or accessing information on your device is necessary to transmit a communication over an electronic communications network or is strictly necessary to provide an information society service that you expressly requested. We use cookies covered by this exception only for the necessary purpose.

All other cookies are optional. They must remain disabled until you consent through the cookie banner or settings panel. You can refuse them without losing access to the public content of the Website.

Where a cookie or related identifier involves personal data, the Privacy Policy explains the related processing and your GDPR rights.

Continuing to browse the Website, scrolling, closing the banner or leaving a consent option unanswered does not constitute consent.

4. Cookie categories

The Website may use the categories below. A category appears in the live settings panel only if the Website uses at least one cookie in that category.

Category	Purpose	Consent
Strictly necessary	Delivers requested pages, protects the Website, balances traffic, remembers cookie choices or provides another function specifically requested by the visitor.	Not required where the cookie is genuinely necessary.
Preferences	Remembers optional settings such as language, display or other convenience choices.	Required unless the cookie is necessary to provide a function expressly requested by the visitor.
Analytics	Measures visits and use of the Website so that aggregated patterns, errors and performance can be assessed.	Required.
Marketing	Measures campaigns, supports advertising or helps build an interest profile across websites.	Required.
External media	Loads optional content from another platform, such as a video, map or social-media item, where that platform stores or accesses information on the visitor's device.	Required.

Rejecting an optional category prevents cookies in that category from being set by the Website. It does not delete cookies placed during an earlier consent period; you can remove those through your browser and change your choice in the Website's cookie settings.

5. Cookie declaration

The current cookie declaration is displayed in the Website's "Cookie settings" panel and forms part of this Policy. It is accessible before you make a choice. For each cookie or similar technology in use, it identifies:

- its name;
- its specific purpose and category;
- whether it is first-party or third-party;
- its provider and the recipient of the related information;
- the provider's country;
- its expiry period or the criteria used to determine that period; and
- where relevant, information about a transfer outside the EEA or profiling.

The declaration is updated whenever a website component, analytics service, embedded item, advertising tool or consent platform is added, removed or reconfigured.

6. Third-party services

Some optional Website functions may be supplied by other organisations. If enabled, these providers may set their own cookies or receive device and usage information only after you consent. Their handling of data is also governed by their privacy notices.

Where a provider processes personal data outside the European Economic Area, INFOTECH applies an appropriate transfer mechanism as described in the Privacy Policy. The live cookie declaration names the provider and identifies the relevant transfer information so that you can review it before making a choice.

7. Managing your choices

When you first visit the Website, the first layer of the cookie banner provides equally accessible options to:

- accept all optional cookies;
- reject all optional cookies; or
- select individual categories.

Optional categories are switched off by default. The banner does not treat silence, continued browsing or closing the banner as consent.

Necessary cookies cannot be disabled through the consent tool because the Website needs them for the requested function or secure operation.

You can change or withdraw your consent at any time through the "Cookie settings" link in the Website footer or another control that remains clearly visible while you use the Website. Withdrawing consent is as easy as giving it. Withdrawal applies to future use and does not affect the lawfulness of processing that occurred before it.

You can also delete or block cookies through your browser. Browser controls operate separately from the Website's consent tool, are not a substitute for the Website's withdrawal mechanism and may need to be adjusted on each device and browser. Blocking necessary cookies can prevent some functions from working correctly.

8. Automated decision-making and profiling

The Website does not use cookie data to make decisions that produce legal effects or similarly significantly affect you solely by automated means.

If optional advertising or cross-site tracking is introduced, the live cookie declaration and Privacy Policy will explain any related profiling before consent is requested.

9. Updates to this Policy

We may update this Cookie Policy when the Website's technologies, providers or legal requirements change. The current version will show the latest update date. A material change to optional cookies may require us to ask for your consent again.

10. Contact

Questions about cookies used on the Website may be sent to:

"INFOTECH" SIA at info@infotech.lv. Full company and contact details are provided in the Privacy Policy and Terms of Use.
